22	23	24	25	26	27	28
War Memorial						
		Nov 1 if solstice 22	Nov 1 if solstice 21			

* Day numbers are: first, the day of the month, second, the day of the year.

* Days in cyan are freedays (including weekends).

Copyright © Warren Mars

* Note that these freedays are generic, and do not necessarily correspond to the actual freedays of any country.

* These freedays have been allocated to give long weekends in every case and are weighted strongly to times of good weather, so that people can go away to the countryside.

* These freedays are given a theme based on universal human values and these are mostly themes that are already granted holidays in most countries.

* Note that Thellid Leap Years are often NOT the same as Gregorian ones. Check http://infinitedimensions.org/devices/thellid_calendar/thellid_calendar.htm to get the Thellid Leap Years.
